Hobbies

I love to create and try new things! Whether it’s playing around on my guitar or piano, running around with my 5 year old, investigating the cause of a broken HVAC unit, or developing an idea for a cool web application, I love to problem solve, explore and learn. I regularly use my aptitude for troubleshooting to quickly and efficiently maintain several hundred job sites at my current job. One of the problems I’ve faced is managing and recording such a large swathe of HVAC units. My solution? I developed a flask application and deployed it on a Linux server that I configured from scratch. I now use that application to track and maintain stock for these sites.
